

Functional Requirement Document

Here is the detailed Functional Requirement Document (FRD) based on the provided Business Requirement Document (BRD) and adhering to the "Coding Requirements" section.

FR-E2E-001: E2E Policy Services Data Extraction Mapping

- Title: E2E Policy Services Data Extraction Mapping for K2H Data
- Description: The system must extract data from various source tables in Microsoft SQL Server database and load it into a target Oracle database table (STG_E2E_BC_K2H_TXDB_DATA) using a mapping (m_E2E_BC_K2H_DATA_EXTRACTION).
- Preconditions:
 - The source database (Microsoft SQL Server) is available and accessible.
 - The target database (Oracle) is available and accessible.
 - The mapping (m_E2E_BC_K2H_DATA_EXTRACTION) is properly configured and validated.
- Main Flow / Functional Steps:
 - 1. Source Data Extraction:**
 - Extract data from the following source tables:
 - T_TX_REQUEST_POLICY
 - T_TX_BASIC
 - T_TX_RELATION
 - T_TX_REQUEST
 - T_TX_DTL_BENEFICIARY_CHANGE
 - Retrieve the specified fields from each source table (as listed in the "Folder Name" -> "Source Name" -> "Field Name" section).
 - 2. Data Transformation:**
 - Perform the necessary data transformations using the mapping (m_E2E_BC_K2H_DATA_EXTRACTION).
 - The mapping includes various transformations (e.g., SQ_, JTX, EXP) to process the extracted data.
 - 3. Target Data Loading:**
 - Load the transformed data into the target Oracle database table (STG_E2E_BC_K2H_TXDB_DATA).

- Map the transformed data to the corresponding target fields (as listed in the "Folder Name" -> "Target Name" -> "Field Name" section).

4. Mapping Execution:

- Execute the mapping (m_E2E_BC_K2H_DATA_EXTRACTION) to perform the data extraction, transformation, and loading.
- Additional Requirements:
 - The mapping (m_E2E_BC_K2H_DATA_EXTRACTION) should be designed to handle errors and exceptions properly.
 - The system should be able to log and track any errors or issues that occur during the data extraction, transformation, and loading process.

The requirements listed above are based on the "Coding Requirements" section of the provided BRD. If there are any discrepancies or inconsistencies, please let me know so I can further clarify or correct the FRD.
