

Executive Summary

- This Privacy Impact Assessment (PIA) evaluates data processing for ingesting and transforming customer and order data within the Application system.
- Focus is on Delta Live Tables ETL flows, personal data categories handled, security controls, risk identification, and regulatory compliance (GDPR, ISO 27701, NIST).

Project Overview and Purpose of Processing

- Ingestion of customer/order data from CSVs to enterprise Delta tables.
- Cleansing, transformation with computed columns, historical (SCD Type 2) tracking, and aggregation for analytics.
- Purpose: analytics, reporting, and historical analysis.

Description of Personal Data Categories Processed

- Customer Name
- EmailId
- Region
- Customer and Order Identifiers

Data Flow Architecture (collection, storage, processing, sharing)

- See below for simplified industry-standard architecture diagram.
