

Requirements Traceability Matrix (RTM)

****Legend:****

- BRD: Business Requirements Document
- FR: Functional Requirement
- TS: Test Scenario
- TC: Test Case
- Status: N - Not Started, IP - In Progress, P - Passed, F - Failed

Component	User Story/Feature Mapping	Code Module/Repo Reference	Test Scenario ID	Test Case ID
Loader Module	US-1: As a pipeline, I load sources	src/ingest/customer.py, src/ingest/order.py	TS-1	TC-1
Schema Registry	US-2: As a dev, I define schema	src/schema/schemas.py	TS-2	TC-2
Transformation Engine	US-3: As a user, see enriched order	src/transform/order_totalamount.py	TS-3	TC-3
Data Cleanser	US-4: As analyst, require clean data	src/cleanse/customer.py, src/cleanse/order.py	TS-4	TC-4
Table Creation Handler	US-5: As admin, I need output table	src/provision/ordersummary.py	TS-5	TC-5
Table Handler	US-6: As compliance, see history	src/transform/scd_ordersummary.py	TS-6	TC-6
Schema Validator	US-7: As ops, consistent schema	src/schema/validate_ordersummary.py	TS-7	TC-7
Table Processor	US-8: As audit, need history	src/transform/scd_handler.py	TS-8	TC-8
Aggregate Table Provisioner	US-9: As business, see spend daily	src/provision/customeraggregatespend.py	TS-9	TC-9
Aggregation Engine	US-10: As exec, view daily total spend	src/aggregate/spend.py	TS-10	TC-10
End-to-End Tables Pipeline	US-11: As admin, run end-to-end process	pipelines/dlt_pipeline.py	TS-11	TC-11
