

- Document Control
- System Name: Application
- Version: 1.0
- Author: Data Engineering Team
- Date: 2024-06-12
- Status: Draft
- Executive Summary
 - The Application facilitates an automated ETL pipeline involving source CSV data ingestion, transformation, cleaning, aggregation, and SCD Type 2 history management, implemented using Delta Live Tables.
- Business Objectives
 - Automate data ingestion from CSV files to Delta tables
 - Ensure data quality through null and duplicate removal
 - Aggregate customer spend and maintain accurate, auditable transaction history
 - Enable change data capture via SCD Type 2 implementation
- In-Scope
 - Source CSV data reading and delta table loading
 - Schema enforcement for customer and order tables
 - Data transformation and cleaning logic
 - Creation of ordersummary and customeraggregatespend tables
 - Aggregation logic on ordersummary data
 - SCD Type 2 implementation for ordersummary
 - Process deployment using Delta Live Tables
- Out-of-Scope
 - Any manual data manipulation
 - External system integrations beyond defined delta tables
 - Real-time or streaming ingestion
 - Data visualization or reporting dashboards
- Stakeholders
 - Data Engineering Team
 - Business Analysts
 - Compliance Team
- Business Requirements

BR-ETL-001 — Load Source Customer Data

- Description: Read customer CSV data and load to delta table /Volumes/gen_ai_poc_databrickscoe/sdlc_wizard/customerdata
- Business Value: Automated, structured customer data ingestion
- Priority: High

BR-ETL-002 — Load Source Order Data

- Description: Read order CSV data and load to delta table /Volumes/gen_ai_poc_databrickscoe/sdlc_wizard/orderdata
- Business Value: Automated, structured order data ingestion
- Priority: High

BR-ETL-003 — Customer Table Schema Enforcement

- Description: Enforce schema with fields CustId, Name, EmailId, Region for customer table
- Business Value: Consistency and data quality assurance
- Priority: High

BR-ETL-004 — Order Table Schema Enforcement

- Description: Enforce schema with fields OrderId, ItemName, PricePerUnit, Qty, Date, CustId for order table
- Business Value: Consistency and data quality assurance
- Priority: High

BR-ETL-005 — Calculate TotalAmount Field

- Description: Add column TotalAmount to order table ($\text{PricePerUnit} * \text{Qty}$)
- Business Value: Simplifies downstream aggregation and analytics
- Priority: Medium

BR-ETL-006 — Data Quality: Null and Duplicate Removal

- Description: Remove nulls and duplicates from customer and order tables
- Business Value: Improves analytical accuracy and reliability
- Priority: High

BR-ETL-007 — Create Ordersummary Table

- Description: Create ordersummary table in catalog=gen_ai_poc_databrickscoe, schema=sdlc_wizard if not exists
- Business Value: Centralized storage for enriched order data
- Priority: High

BR-ETL-008 — SCD Type 2 on Ordersummary

- Description: Apply SCD Type 2 methodology to ordersummary based on updates in customer table
- Business Value: Ensures historical accuracy and traceability of data changes
- Priority: High

BR-ETL-009 — Create CustomerAggregateSpend Table

- Description: Create customeraggregatespend table with columns Name, TotalAmount, Date if not exists
- Business Value: Enables spend analysis and reporting
- Priority: Medium

BR-ETL-010 — Aggregate Customer Spend

- Description: Aggregate TotalAmount grouped by Name and Date from ordersummary and load into customeraggregatespend
- Business Value: Facilitates spend tracking for business insights
- Priority: Medium

BR-ETL-011 — Delta Live Tables Implementation

- Description: Implement the entire processing steps using Delta Live Tables
- Business Value: Simplifies workflow orchestration and monitoring
- Priority: High
- Assumptions & Constraints
 - Source data is available and accessible via defined CSV file paths
 - Only the specified schemas will be enforced
 - Delta Lake infrastructure is operational
- Success Metrics
 - Successful, automated runs from CSV to target tables
 - Zero null/duplicate records post-processing
 - Accurate aggregation results in customeraggregatespend
 - SCD Type 2 audit trails present
- Risks & Mitigations
 - Source data format changes — Mitigation: Schema enforcement and validation
 - Data quality issues from source — Mitigation: Robust null and duplicate handling logic
 - Infrastructure/permission errors — Mitigation: Pre-execution checks and monitoring

- Approval
- Business Owner: Data Program Manager
- Data Engineering Lead: Lead Data Engineer
- Compliance Review: Data Privacy Officer
- Date: 2024-06-12

- Appendix

Appendix A: Source Definitions

Source Name | Type | Location | Format | Notes

customerdata | CSV | /Volumes/gen_ai_poc_databrickscoe/sdlc_wizard/customerdata | CSV | Source for customer records

orderdata | CSV | /Volumes/gen_ai_poc_databrickscoe/sdlc_wizard/orderdata | CSV | Source for order records

Appendix B: Target Definitions

Target Name | Layer | Table | Columns | Notes

ordersummary | Gold | sdlc_wizard.ordersummary | OrderId, ItemName, PricePerUnit, Qty, Date, CustId, Name, EmailId, Region, TotalAmount, EffectiveFrom, EffectiveTo, ActiveFlag | SCD Type 2 Table

customeraggregatespend | Gold | sdlc_wizard.customeraggregatespend | Name, TotalAmount, Date | Aggregate spend facts

Appendix C: Transformations

Step | Transformation | Input | Output | Logic

1 | Calculate TotalAmount | orderdata | orderdata.TotalAmount | PricePerUnit * Qty

2 | Remove Nulls/Duplicates | customerdata, orderdata | Cleaned tables | Filter out null and duplicates

3 | Apply SCD Type 2 | ordersummary | ordersummary | Track changes with EffectiveFrom/To, ActiveFlag

4 | Aggregate Spend | ordersummary | customeraggregatespend | Group by Name, Date, sum TotalAmount

Appendix D: Business Rules

Rule ID | Area | Description | Source

BR-ETL-003 | Customer Table | Enforce schema for CustId, Name, EmailId, Region | BRD

BR-ETL-004 | Order Table | Enforce schema for OrderId, ItemName, PricePerUnit, Qty, Date, CustId | BRD

BR-ETL-006 | Data Quality | Remove nulls and duplicates in tables | BRD

Appendix E: Process Flow

Step | Description | Dependency

1 | Load customer CSV and order CSV data | Source data files

2 | Enforce schema, clean data | Step 1

3 | Calculate TotalAmount | Step 2

4 | Populate ordersummary and apply SCD Type 2 | Step 3

5 | Aggregate customer spend to summary table | Step 4
